Canal Winchester Unveils New Web Site

CANAL WINCHESTER– The Village of Canal Winchester is proud to announce the launch of its newly redesigned Web site, www.canalwinchesterohio.gov. The new site has a cleaner look, offers more information and is easier to navigate. New features of the site include local weather conditions, an advanced search engine function and an option for site users to submit questions online through the issue reporting page or direct e-mail links.

“We are excited to offer our residents and others wanting information about Canal Winchester a Web site that has everything from a calendar of community events to information on municipal services,” said Carrie Hoover, community affairs director for the Village of Canal Winchester. “Individuals are now able to find answers to many of their questions online rather than contacting village staff. Of course, we still welcome anyone who can’t find the information they need to contact staff directly.”

The village worked with Maximation, its IT consultant, to develop the new Web site. All village departments worked hard to make sure information they felt Web users would need was incorporated into the site.

Hoover added, “The village encourages residents and visitors to explore our new site and let us know what they think. If there is something the site user thinks should be there that isn’t, hopefully they will let us know through our issue reporting page so we can consider their suggestions when making updates.”
